This EAP is to be followed for all EVENTS under the direction of the Event Organization Committee and Facilities Services staff. Members of the general public and non-Varsity Events should follow the instruction of the Facilities Staff. The above protocols and equipment are intended for all event organizers and Facilities Services Staff.

<p>Evacuations</p>	<p>General Information</p> <p>Evacuation can occur for a number of reasons including fire, chemical spill, radiation spill, bomb threat, or toxic gas release. If there is a need to evacuate, please leave via the nearest emergency exits</p> <ul style="list-style-type: none"> ➤ Determine in advance the nearest exit to your work location and the route you will follow to reach that exit in the event of an emergency. ➤ Remember there are several fire escapes throughout the University buildings in the event one is blocked or unsafe. ➤ Follow instructions of the Emergency Wardens. ➤ DO NOT USE ELEVATORS. - Evacuation route maps are next to elevators. ➤ Remove high heels to avoid tripping. ➤ Do not rush or crowd. Use handrails in stairwells and stay to the right. ➤ Move to your muster point unless otherwise instructed. ➤ Assist people with disabilities (see disabilities section). <p>Evacuating the Building</p> <ul style="list-style-type: none"> ➤ Move away from the building quickly. ➤ Watch for falling glass or debris. ➤ Stay with your Emergency Warden who will keep track of employees from your area. ➤ After you have evacuated the building, DO NOT RE-ENTER until notified that it is safe to do so by Protective Services or Edmonton Fire Rescue.
<p>Evacuations with Persons with Disabilities</p>	<p>Persons Using a Wheelchair</p> <p>Firefighters and first responders are trained to assist persons in wheelchairs to evacuate buildings. However, if people in wheelchairs are in immediate danger and ask for your assistance, you may, if it is safe to do so, assist them to relocate to a safer location such as a stairwell. Once you have evacuated the building, immediately inform a Building Warden or available firefighter of the location of any person in a wheelchair who remains in a building.</p> <p>Persons who are Visually Impaired</p> <p>Most persons who are visually impaired will be familiar with the immediate area. Tell the person the nature of the emergency and offer to guide him/her. As you walk, tell the person where you are and advise of any obstacles. When you have reached safety, orient the person to where he/she is and ask if any further assistance is needed. Do not leave the person alone.</p> <p>Persons who are Hearing Impaired</p> <p>Persons who are hearing impaired may not perceive emergency alarms and an alternative warning technique is required. Two methods of warning are: Writing a note telling what the emergency is and the nearest evacuation route (e.g., "FIRE— Go out rear door to the right and down, NOW!") Turning the light switch on and off to gain attention, then indicating through gestures or in writing what is happening and what to do.</p> <p>If you are a Student with a Disability</p> <p>It is recommended that if you require assistance and may be on an upper floor and/or if you are unable to walk down the evacuation stairwells on your own, that you make arrangements for assistance in advance of an emergency. This could include arranging for someone (a roommate or classmate) to accompany you to a safe stairwell in order to meet with local evacuation officials.</p> <p>You should also have access to a cell phone so you can contact Protective Services (780-492-5050) and advise them of your location. In the event of an evacuation no one should use the elevators.</p>
